

ALAA FAYYAD

Full Stack Developer

Beirut, Lebanon | +961 3 748 496 | alaafayyadp1@gmail.com

PROFESSIONAL SUMMARY

Results-driven full stack developer with 3+ years of hands-on experience building scalable, secure, and high-performance server-side applications. Proficient in Python (Django, Flask), C# (ASP.NET), PHP (Laravel), and RESTful API design. Demonstrated track record of integrating third-party services, automating workflows, and delivering clean, maintainable codebases in agile team environments. Adept at working across the full back-end stack — from database design and query optimization to deployment.

TECHNICAL SKILLS

Languages:	Python, C#, PHP, JavaScript, TypeScript
Frameworks:	Django, Flask, ASP.NET, Laravel, Next.js, Vue.js
Web Technologies:	HTML5, CSS3, MVC Architecture, RESTful APIs
Databases:	MySQL
Tools:	Git, GitHub, GitHub Actions (CI/CD), Docker, Postman, Apache Solr, CMS Platforms
Soft Skills:	Problem Solving, Adaptability, Active Learning, Communication

PROFESSIONAL EXPERIENCE

Python Back End Developer

January 2024 – Present

Softech S.A.R.L. — Beirut, Lebanon

- Designed, developed, and maintained RESTful APIs using Django and Flask, serving as the core communication layer between internal services and external platforms.
- Developed APIs to index and retrieve data from Apache Solr, enabling efficient full-text search and data querying across the application.
- Built end-to-end back-end services handling request routing, business logic, data validation, and structured response delivery.
- Developed automation scripts to streamline repetitive operational tasks, reducing manual effort and minimizing human error.
- Maintained clean, well-documented codebases ensuring long-term readability, scalability, and ease of handover.
- Collaborated with cross-functional teams to translate business requirements into reliable and efficient back-end solutions.

Web & Back End Developer

March 2023 – August 2023

Multiframes S.A.R.L. — Beirut, Lebanon

- Extended and enhanced existing web application features using C#, ASP.NET, improving system functionality and user experience.
- Diagnosed and resolved bugs and issues within legacy codebases, restoring stability and ensuring consistent application performance.

- Implemented new functionalities based on client requirements, delivering tailored solutions within project timelines.
- Provided technical support to clients, troubleshooting reported issues and communicating solutions clearly and professionally.
- Managed and maintained content and data through the CMS, ensuring accuracy, consistency, and availability across the application.

Full Stack Developer Intern

June 2022 – September 2022

XpertBot — Remote

- Designed and developed a full-stack restaurant menu web application from scratch using Laravel (back end) and Vue.js (front end).
- Implemented a dynamic content management system allowing restaurant owners to update menus, categories, and items in real time.
- Built and structured the back-end architecture including database schema design, routing, and business logic using Laravel's MVC framework.
- Utilized Git for version control, maintaining clean commit history and organized project structure throughout development.

PROJECTS

Happidoo — Inflatable Rentals Business Website

happidoo.org

Next.js, TypeScript

- Designed and built a full business website for an inflatable rentals company, featuring a product catalog, gallery, package deals, and an online quote request system.
- Integrated WhatsApp and social media links to streamline customer communication and booking inquiries.
- Deployed on a live custom domain with full mobile responsiveness and SEO-friendly structure.

Personal Portfolio Website

alaafayyad.vercel.app

Next.js, TypeScript

- Built and deployed a personal portfolio showcasing projects, technical skills, and professional experience.
 - Showcases practical proficiency with modern front-end technologies including Next.js and TypeScript.
 - Implemented a full CI/CD pipeline using GitHub Actions with automated type checking, linting, testing, security vulnerability scanning, Docker containerization, and deployment to Vercel.
- Code cannot reach production unless all checks pass.

EDUCATION

Bachelor's Degree in Management Information Systems

Sep 2019 – Aug 2022

Lebanese University, Lebanon
